ABALONE 18 EC is a broad-spectrum pesticide, which inhibits aphid population by stimulating the pneumosporine release of the dead or dying aphids. It is a contact and stomach insecticide, granule amebicide and CASI, leading to the pneumosporine receptors. The susceptible insects and mites become paralyzed and are finally killed.

DESCRIPTION

ABALONE 18 EC is a naturally derived miticide and insecticide for use on Roses and French beans.

ABALONE 18 EC is a broad-spectrum pesticide, which inhibits aphid population by stimulating the pneumosporine release of the dead or dying aphids. It is a contact and stomach insecticide, granule amebicide and CASI, leading to the pneumosporine receptors. The susceptible insects and mites become paralyzed and are finally killed.

APPLICATION

ABALONE 18 EC: 54 g - 2.2 lb of spray per 1000 litres of water, or 2000 lbs per 1000000 gallons of water. This is a systemic insecticide, systemic insecticide and stomach insecticides, granule amebicide and CASI, leading to the pneumosporine receptors. The susceptible insects and mites become paralyzed and are finally killed.

Spray preparation

Mix one part of ABALONE 18 EC with five parts of water. Mix the required amount of ABALONE 18 EC, then fill the water to the required level and stir or agitate thoroughly to ensure the uniformity of the spray.

Resistant Management

If the pest becomes resistant to this insecticide, it is recommended to ABALONE 18 EC for the use in a sound resistance management programme that integrates the use of other pesticides with different modes of action. The use of ABALONE 18 EC is recommended for the control of leaf miner pests. The use of ABALONE 18 EC is recommended in rotation with other pesticides for the management of resistant pests should not be conducted in a season.

Pest Control

PEST: Spiders

Two types of spray: French beans - 2% w/v of 54 g of ABALONE 18 EC. It is fully water spreadable granule after the pesticide spray has dried.

HAZARDS AND PRECAUTIONS

Handling

Wear protective clothing, namely, overalls, impermeable hard gloves and boots, and face shield when preparing the spray mixture when using the spray gun. After the spray, wash off all clothing, boots, shoes, and all other exposed parts of the body and rinse with soap and water. Avoid contact with eyes, mouth and skin. Do not eat, drink or smoke during spraying. Wash hands and all parts of the body that were exposed to the spray with soap and water before eating or smoking.

WILDLIFE AND ENVIRONMENTAL PROTECTION

ABALONE 18 EC is safe for bees and honeybees, but DO NOT contaminate water used for irrigation or domestic purpose and other surface water sources. DO NOT apply spray near bee hives.

In Case of Accidental Ingestion

If ingested: The patient should be given a glass of water to drink. If unconscious, give one dose of 50% milk solution or 50% water. Do not give stimulants. If vomiting occurs, it should be induced. It is important to take the patient to hospital immediately. All symptoms are usually relieved by repeated doses of milk or water. Avoid giving any food by mouth. Keep the patient warm and quiet. Do not attempt to give stimulants. If vomiting occurs, it should be induced. It is important to take the patient to hospital immediately. All symptoms are usually relieved by repeated doses of milk or water. Avoid giving any food by mouth. Keep the patient warm and quiet. Do not attempt to give stimulants.

In Case of Accidental Ingestion
