AFRIBAT 69 WP

For control of Downy Mildew on Roses.
(Dawa ya kudhibiti Downy Mildew kwa warali)

COMMERCIAL AND AGRICULTURAL CLASS (KUNDI LA BIASHARA NA KILIMO)

OSARAAE: (KHAMAMA): Dimethoate 90 g/kg + Mancozeb 600 g/kg

REGISTRATION NO./NAMBIARI YA USAJILI: PCPB(CR)1320

RE-ENTRY INTERVAL: 1 Hour

USE: DIMETHOATE/FATE 69 WP is a protective action. Best results are achieved when it is applied before disease onset or immediately after the appearance of the symptoms. Throughout the season, the plant surfaces are treated with a protective sprayer.

Hazards and Precautions: Handling Precautions: Keep out of reach of children and pets. Do not inhale spray mist or come in contact with eyes or skin. Avoid contact with food or water. Do not touch treated areas. Do not use on plants that are injured or stressed. Keep away from fires and sparks. Do not allow to come into contact with water sources. Avoid exposure to the spray mist. Do not breathe the spray mist. Do not contaminate water sources and flood with water.

Storage: Store AFRIBAT 69 WP under lock and key and out of reach of children in a cool dry place away from foods, feed and animals. Keep away from fire and sparks. Do not allow to become wet or overheated in storage. Avoid excessive amounts on the product. Do not store below 0°C.

Disposal: Tolerate the proper disposal of empty containers. Do not use the empty bags for any other purpose or attempt to pump empty bags to prevent spillage or fume release. Keep away from fires and sparks. Do not allow to be used or stored in water sources. Do not allow to become wet or overheated in storage.

Environmental: Hazard: Hazardous to fish. Do not contaminate water sources and flood with water.

Food and Feed: The product is not intended for use on food and feed. Do not contaminate water sources and flood with water.

Pet: The product is not intended for use on pets. Do not contaminate water sources and flood with water.

Producers: The product is not intended for use on crops intended for human consumption. Do not contaminate water sources and flood with water.

Careless use will result in damage to the environment. Disposal: Tolerate the proper disposal of empty containers. Do not use the empty bags for any other purpose or attempt to pump empty bags to prevent spillage or fume release. Keep away from fires and sparks. Do not allow to become wet or overheated in storage.

Mancozeb reacts with and mineralizes, the sulfuryl group of arsenic acids and eventually target cells, resulting in disruption of lipid metabolism, reproduction and production of ATP.

Mode of action: It is a broad-spectrum, non-systemic fungicide with protective action.

Compatibility: Not compatible with existing agents or activity.

Direct exposure to the product is prohibited for poultry and cell wall synthesis. Prevents the formation of the complete cell wall cell. Mode of action: Local systemic fungicide with good protective and antipathogen activity.

AFRIBAT 69 WP

Mancozeb blockages the transport of sulfuryl groups into the target cells causing disruption of lipid metabolism, reproduction and production of ATP.

Mode of action: It is a broad-spectrum, non-systemic fungicide with protective action.
