DESCRIPTION

AZOXY TOP 325SC is a broad-spectrum fungicide for control of angular leaf spots, anthracnose and rust in French beans, ascochyta leaf spots and powdery mildew in snow peas and botrytis and powdery mildew in roses.

MODE OF ACTION

AZOXY TOP 325SC contains azoxystrobin and difenoconazole that complement each other.

Azoxystrobin has preventive, curative and eradicant activity with contact and translaminar properties and acts by inhibiting respiration in the mitochondrial in the fungi, thereby inhibiting spore germination, germ tube development and sporulation. Difenoconazole has translaminar and systemic action with preventive and curative properties and acts on fungi during penetration and haustoria formation. It stops development of fungi by interfering with the biosynthesis of sterols in cell membranes.

DIRECTION FOR USE

Crop	Disease	Application Rate
French beans	Angular leaf spots, anthracnose, rust	500 ml/Ha (10 ml/20L)
Snow peas	Ascochyta leaf spot, powdery mildew,	
Roses	Botrytis, powdery mildew	750 - 1000 ml/Ha (15 - 20 m1/20L)

PRE-HARVEST INTERVAL

French beans, snow peas - 7 days.

RE-ENTRY PERIOD: 6 hours.

Application Timing and Technique

French beans and snow peas: Start spray application before disease condition appears at flower initiation stage at 7 days interval and with adequate spray volume of 1,000 L of water/Ha to ensure thorough coverage of plant surface. Do not apply more than three (3) consecutive sprays on a crop in a season.

Roses: Start spray application before disease condition appears or when weather condition favour disease development at 7 days interval. Apply with adequate spray volume of 1,000 L of water/Ha to ensure thorough coverage of plant surface.

Preparation of Spray Mixture

Half fill the spray tank with water.
