NOTICE TO THE USER: This pest control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use or store this product under unsafe conditions.

WARRANTY: Sellers guarantee is limited to the terms set out on the label and subject thereto, the buyer assumes the risk for persons or property arising from the use or handling of this product and accepts the product in that condition.

GENERAL DESCRIPTION: LEVO™ 2.4 SL is a biological insecticide for the control of Spidermites and Aphids in Roses and Tomatoes, Aphids and Whiteflies in French beans.

MODE OF ACTION: Prosolier oximazine is a contact and stomach poison against Insects, with anti-feeding and repelling activity. Chemical group: Plant extract.

DIRECTIONS FOR USE: LEVO™ 2.4 SL should be applied as a full cover spray on all foliage parts. Thorough, even coverage of upper and lower leaf surfaces is essential. Ensure that the sprayer and spray equipment are clean and correctly calibrated. For best results apply Levo™ 2.4 SL early in the morning or late in the evening. In roses, users are advised to always check for crop compatibility / tolerance by treating a few plants before large-scale application.

RESISTANCE MANAGEMENT: Levo™ 2.4 SL applications should be alternated with other registered products of other chemical groups with different mode of action.

PREPARATION OF SPRAY MIXTURE: Half fill the spray tank (knapsack) with water. Add the required amount of LEVO™ 2.4 SL and mix while stirring or agitating, then fill the water to the required level and continue with stirring or agitation until the mixture is thoroughly uniform.

PRE-HARVEST INTERVAL (PHI): Tomatoes and French Beans-1 Day.

HAZARDS / PRECAUTIONS

HANDLING: Wear protective clothing, face mask, gloves, overall, boots and goggles when handling the products. Do not eat, drink or smoke while handling the product. Wash thoroughly with soap and plenty of water after handling the product. Wash protective clothing before reusing them.

STORAGE: Store in tightly closed original container in a cool dry well ventilated place, under lock and key so that children and unauthorized persons do not have access. Keep away from food, drinks and animal feeds.

DISPOSAL: Triple rinse, puncture or crush empty containers before disposal in a safe and authorized place in accordance with National legislation and regulations on chemical disposal. Do not re-use empty containers for any other purpose. Pesticide spray mixture or reinstate that cannot be used must be disposed where it cannot contaminate surface water and ditches.

PESTICIDE LEAKAGE AND SPILLAGE: In the event of heavy spillage, collect the contaminated soil layer and dispose off in an authorized place away from water supplies. Soaking in sand, soil or sawdust may collect small spillage. Contaminated absorbent material must be stored in marked waste bins prior to disposal in an authorized land fill site in accordance with national legislation and regulations. The pesticide store must be decontaminated by washing with a lot of water.

ENVIRONMENTAL HAZARDS: Toxic to fish and birds. Do not spray when bees are actively foraging. Do not contaminate ponds and waterways by direct application, cleaning of equipment, disposal of waste and empty containers.

FIRST AID INSTRUCTIONS

Skin contact: Wash thoroughly with soap and water. Seek medical advice.

Eye contact: Flush with plenty of water for 15 minutes & get medical attention.

Ingestion: Wash out mouth with plenty of water. Do not induce vomiting. Do not give anything by mouth to unconscious person. Seek medical advice.

Inhalation: If inhaled, remove patient to fresh air & get medical attention.
